JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Analytical pyrolysis
A new apparatus for laser micropyrolysis–gas chromatography/mass spectrometry, 101

Bagasse
Fourier transform infrared spectroscopic study of thermal degradation of sugar cane bagasse, 61

Carbonization
Carbonization of wet and preheated coal. Effect on coke quality and its relation with textural properties, 119
Fourier transform infrared spectroscopic study of thermal degradation of sugar cane bagasse, 61
Chemical vapour deposition
IR laser-induced chemical vapour deposition of silicon oxycarbide phases from 1,1,3,3-tetramethyldisiloxane, 153
Coke mechanical strength
Carbonization of wet and preheated coal. Effect on coke quality and its relation with textural properties, 119
Coke reactivity
Carbonization of wet and preheated coal. Effect on coke quality and its relation with textural properties, 119
Coke textural properties
Carbonization of wet and preheated coal. Effect on coke quality and its relation with textural properties, 119
Computer modeling
Characterization of humic and soil particles by analytical pyrolysis and computer modeling, 1

Derivative thermogravimetric
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89

Fluidized bed reactor
Pyrolysis of polyolefins with steam to yield olefins, 75
Fourier transform infrared spectorscopy
Fourier transform infrared spectroscopic study of thermal degradation of sugar cane bagasse, 61
Fourth-period
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89

Gas chromatography
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
GC/MS
A new apparatus for laser micropyrolysis–gas chromatography/mass spectrometry, 101

Humic particles
Characterization of humic and soil particles by analytical pyrolysis and computer modeling, 1

Infra-red
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89

Kinetics
Kinetic study of the secondary thermal decomposition of Kraft lignin, 131
Kraft lignin
Kinetic study of the secondary thermal decomposition of Kraft lignin, 131

Laser induced decomposition
IR laser-induced chemical vapour deposition of silicon oxycarbide phases from 1,1,3,3-tetramethyldisiloxane, 153
Laser pyrolysis
A new apparatus for laser micropyrolysis–gas chromatography/mass spectrometry, 101

Mass spectrometry
Pyrolysis of 1-furoyl-3-phenylthioureas in mass spectrometry, 55
Metal oxides
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
Micropyrolysis
A new apparatus for laser micropyrolysis–gas chromatography/mass spectrometry, 101

Olefins
Pyrolysis of polyolefins with steam to yield olefins, 75

Polyolefins
Pyrolysis of polyolefins with steam to yield olefins, 75
Preheated coal
Carbonization of wet and preheated coal. Effect on coke quality and its relation with textural properties, 119

Reaction scheme
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
Reactor
Kinetic study of the secondary thermal decomposition of Kraft lignin, 131

Sail particles
Characterization of humic and soil particles by analytical pyrolysis and computer modeling, 1
Secondary reaction
Kinetic study of the secondary thermal decomposition of Kraft lignin, 131
Si/C/H/O films
IR laser-induced chemical vapour deposition of silicon oxycarbide phases from 1,1,3,3-tetramethyldisiloxane, 153
Sodium chlorite
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
Steam
Pyrolysis of polyolefins with steam to yield olefins, 75
Sugar cane
Fourier transform infrared spectroscopic study of thermal degradation of sugar cane bagasse, 61

1,1,3,3-Tetramethyldisiloxane
IR laser-induced chemical vapour deposition of silicon oxycarbide phases from 1,1,3,3-tetramethyldisiloxane, 153
Thermal decomposition
Pyrolysis of 1-furoyl-3-phenylthioureas in mass spectrometry, 55
Thermal degradation
Fourier transform infrared spectroscopic study of thermal degradation of sugar cane bagasse, 61
Thermogravimetric
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
Torbanite
A new apparatus for laser micropyrolysis–gas chromatography/mass spectrometry, 101

X-ray diffraction
Role of the fourth-period metal oxides on the pyrolysis of sodium chlorite, 89
